

## SITUATIONS VACANT

### **Production Laboratory Technician I**

- Salary £18,000 to £20,000 (Job Band 2)
- Cambridge, UK
- Permanent
- Full-time
- Closing date: 30<sup>th</sup> November 2018

An opportunity has arisen for a **Production Laboratory Technician** to join a growing biotechnology company based in Cambridge. DefiniGEN is a progressive and dynamic company that uses its proprietary OptiDIFF production platform to robustly generate human cell types. These include liver hepatocytes and pancreatic cells, from Induced Pluripotent Stem Cells (iPSCs), for supply to the pharmaceutical and life science sectors.

We are currently looking to recruit a team player to support production and shipping activities in a growing and varied environment.

#### **Key Responsibilities:**

- Preparation of media and reagents to support production and R&D
- Ensure autoclave runs are completed
- Maintain high level of cleanliness within the laboratory
- Monitoring and maintaining stock inventory levels
- Equipment monitoring and maintenance
- Packing and unpacking shipments/deliveries
- Supporting purchasing and shipping administration activities (office based)
- Ad-hoc duties as required within a small but growing team

#### **Requirements:**

- Educated to BSc degree in a relevant scientific discipline
- Experience in mammalian cell culture or molecular biology would be advantageous
- Good communication and a willingness to take on a varied and dynamic role is essential
- Proficient using standard computer applications (MS Excel, MS Word, etc.)

This is an excellent opportunity for someone interested in pursuing a career in the gene-editing and stem cell fields – with potential to grow into either a Production or Logistics role.

In return we are offering an attractive salary and benefits package. Applicants should apply by cover letter and CV to: [info@definigen.com](mailto:info@definigen.com)
