

F-STAR JOB DESCRIPTION

POSITION:	Biomarker/Bioanalytical Project Manager, Principle Scientist
JOB PURPOSE:	<p>At F-star, we are committed to delivering life-changing treatments to cancer patients. We develop mAb², a novel class of disruptive bispecific antibody-based therapy that have the potential to overcome tumour resistance and restore anti-cancer immunity and responsiveness.</p> <p>Our unique Modular Antibody Technology™ allows us to generate, in a plug-and-play manner, bispecific assets that are uniquely positioned to address significant unmet needs as well as industry challenges. As a result, we are building and progressing a clinical and preclinical pipeline of highly-differentiated drugs, validated by strategic collaborations with leaders both in the immuno-oncology landscape and beyond.</p> <p>F-star has over 100 employees, we based in Cambridge-UK. We are constantly building on decades of combined expertise to deliver the next breakthrough immunotherapies.</p>
KEY RESPONSIBILITIES:	<p>Development and implementation of clinical biomarker and bioanalytical translational project plans of potential candidates as endpoints for:</p> <p style="padding-left: 40px;">PK/ADA</p> <p style="padding-left: 40px;">PD (target engagement, downstream pharmacology)</p> <p style="padding-left: 40px;">Patient selection</p> <ul style="list-style-type: none"> • Act as technical project manager to support the externalisation and operationalization of clinical biomarker and bioanalytical activities • Work with subject matter experts e.g. assay team to select vendors for specific analysis and have awareness of quality vendors offering these solutions • Ensure all aspects for contracting studies are in place including building a strong working relationship with legal and other support functions to provide legal contracts, scope of work plans etc • Manage assay vendors to provide advice and support on scientific and technical aspects of analysis to deliver regulatory, technically and quality compliant, “fit-for-purpose” work packages to support development plans • Monitor studies for their progress and quality related to the scientific integrity • Work collaboratively with CRO’s to ensure all studies are managed in respect to timelines, budget and quality deliverables in alignment with general project management, finance and project teams • Co-ordinate importation or management of data for analysis and reporting in conjunction with functional partners e.g. bio statistics, clinical pharmacology and biology to enable interpretation of biomarker/bioanalytical data by teams • Support the Translational/Clinical Biomarker Leader with timelines, delivery of information and provide regular updates to translational development teams • Reporting of outcomes of studies to relevant governance and project teams • Key stakeholder within translational science/development project sub teams • Provide scientific expertise regarding, non-clinical and clinical biomarker identification, measurement and data analysis
PERSON SPECIFICATION:	<ul style="list-style-type: none"> • Extensive experience within a pharma/biotech/CRO environment in the identification, technical and clinical validation of clinical biomarkers/bioanalysis • Good understanding of biomarker/bioanalytical technologies and experience in trouble-shooting assays • Awareness of the application of biomarkers in immuno-oncology

- Awareness of GxP and CLIA guidelines and capable of trouble-shooting and identifying issues related to overseeing study activities with external vendors
- Demonstrable biomarker/bioanalytical project management expertise and experience monitoring studies in biomarker/bioanalysis of clinical samples
- Ability to multi-task and prioritise work effectively to deliver to timelines whilst maintaining quality
- A can-do attitude, ability to work effectively within highly matrixed project teams with internal and external partners to execute projects at a functional level

What F-star can offer you

We get things done, we keep things simple and we're driven by the science. We're ambitious so we work hard to create an environment where we can take smart risks. We want to be innovative so encourage debate and collaboration to challenge the usual way of doing things. We love our celebrations, socialising and perks, which make F-star a fun and diverse place to work. And most of all, everyone has the opportunity to make a difference.

Benefits:

- Pension (8% non-contributory)
- Long Term Incentive Bonus System
- Private Medical Insurance
- Health cash plan
- Life assurance
- 25 days holiday
- Travel insurance
- Enhanced Maternity, Paternity, Adoption pay
